1. Mass LEGAL Immigration In Canada

Despite what many think, ***LEGAL*** immigration into Canada is actually a much larger threat than illegal aliens, given the true scale of the replacement that is happening. What was founded as a European (British) colony is becoming unrecognizable due to forced demographic changes. There are also social, economic, environmental and voting changes to consider. See this Canadian series, and the UN programs for more detail. Politicians, the media, and so-called “experts” have no interest in coming clean on this.

3. From the 2018 Report To Parliament

Year	TFW	Int Mobility	Student
2015	73,016	175,967	218,147
2016	78,402	207,829	265,111
2017	78,788	224,033	317,328

Remember: This table only covers “temporary” entrants (workers and students), and is outside what politicians typically declare. While these programs are officially marketed as temporary, there are a number of avenues to stay longer and become a permanent resident.

Now, combine the 2017 “temporary” totals with the approximately 330,000 permanent and refugees that the government declares and you get this.

330,000 (Perm + Refugee)
+78,788 (Temp Foreign Workers)
+224,033 (International Mobility)
+317,328 (Student Visas)
950,149 (total)

Correction: while the 2017 totals for Permanent and Refugee were aimed at around 300-350K, the 350K is the one frequently touted. As such, it was the number used originally in the article. The actual is 330K, which is slightly lower.

Now it is certainly true that many will not stay. However, the vast majority of them will try to. There are many legal avenues to extend a visa, or get a new one. Then there comes the sticky issue of chain migration

Think about it: why drop $100,000 on a useless college degree or program, or work for slave labour for years, ***UNLESS*** the ultimate goal was a better life?

While these programs are sold to the public as “temporary”, the reality is that they are

backdoor migration.

However, so-called Conservatives, and even some self-identified Nationalists don't want to talk about the full scope of mass migration in Canada. They prefer to parrot the talking points of the mainstream political parties, who claim there is about 310,000 to 350,000 annually in Canada.

This applies to proposed "reductions" to 250K/annually, (now pegged at 100-150K), while ignoring the true size of the issue. A common talking point of "populists".

Remember the rule from before.

2018	375,390	283,706	91,684	251

Canada's population is "naturally" growing at about 300 people/day, and has been for years. This is births and deaths. Immigration is not taken into account. To be fair, however, the number of illegals giving birth here (creating anchor babies) isn't taken into account.

Of course, even if you need a bigger population, there is another way. It is the ways nations have always done, prior to the "multiculturalism" mental disorder. They grew their populations.

Side note: it's also how Muslims plan to become a global majority and impose Sharia law

everywhere. It’s not as if they embrace multiculturalism or pluralism. And guess what your tax dollars are being used for in Toronto hotels and public housing. See this video from Rebel Media

Now, it doesn’t have to be that way. Hungary, for example, is taking measures to reverse its declining birth rate. While the specifics vary by nation, this is a prime example of a leader putting his people first.

You also never hear mainstream “Conservatives” talking about the idea of promoting bigger

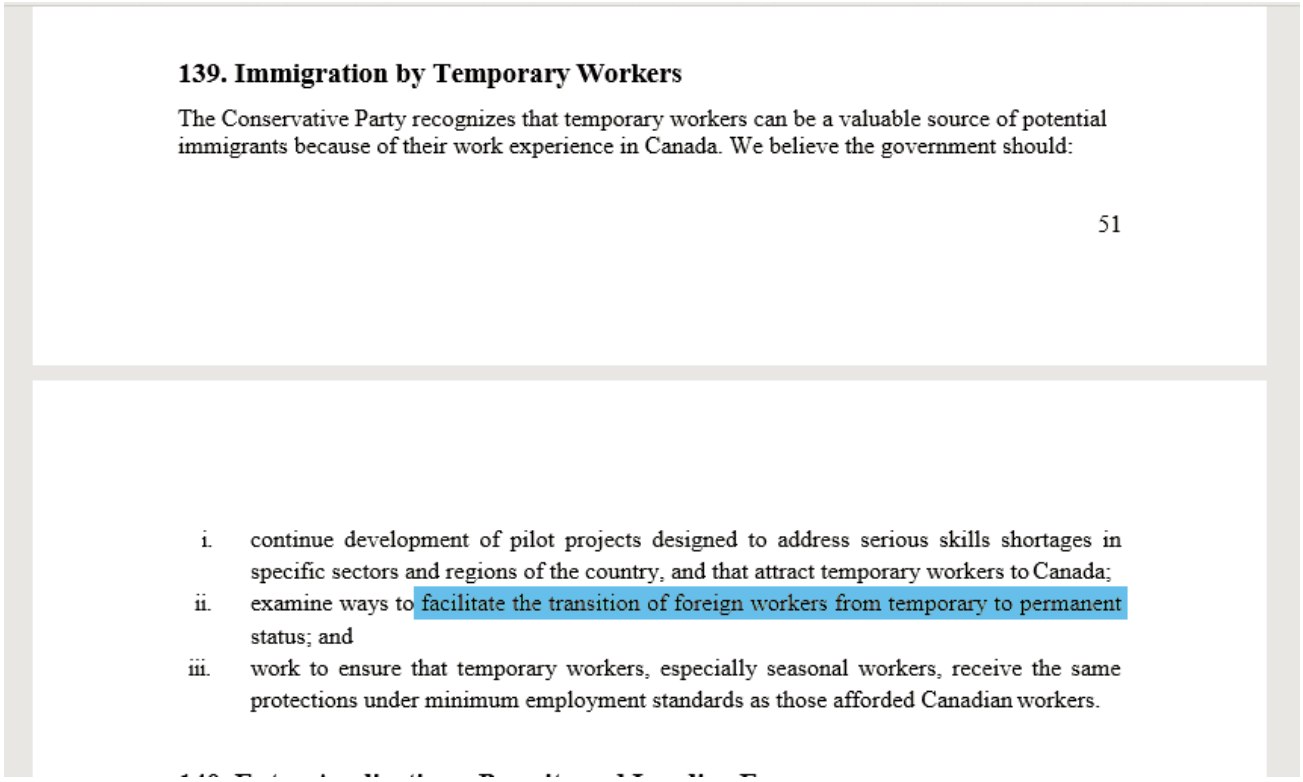
families. It's always "import more and more" and economic growth.

Conservatives give little to no consideration of the natural inclination of people to want children. Nor do they care that people who are raised in Canada grow up as Canadians. Forget the culture. Forget the society. Besides, nations aren't the people, but just abstract ideas apparently.

Canada already has people from a large array of backgrounds. Why not stop and work with what we have?

Ask yourself, which is more of a priority: economic growth, or protecting your way of life and culture? If the former, remember that eventually the demographics shift to such a degree that your way of life can be "democratically" rescinded.

5. Conservatives, Fake Nationalists, Are Gatekeepers



139. Immigration by Temporary Workers

The Conservative Party recognizes that temporary workers can be a valuable source of potential immigrants because of their work experience in Canada. We believe the government should:

51

i. continue development of pilot projects designed to address serious skills shortages in specific sectors and regions of the country, and that attract temporary workers to Canada;
ii. examine ways to facilitate the transition of foreign workers from temporary to permanent status; and
iii. work to ensure that temporary workers, especially seasonal workers, receive the same protections under minimum employment standards as those afforded Canadian workers.

We believe that the Government of Canada should re-establish the Office of Religious Freedom in order to promote the universal right of religious freedom internationally and to advocate for persecuted religious minorities around the world.

152. CANZUK Treaty. CANZUK Treaty Implementation

Subject to thorough security & health checks, CPC will work to realize these objectives among CANZUK countries:

a) Free trade in goods/services

b) Visa-free labour/leisure mobility for citizens, including retirement relocation
Reciprocal healthcare agreement modeled on existing AU / NZ / UK bilaterals

c) Increased consumer choice/protection for travel

d) Security coordination

The Conservative Party of Canada's policy declaration openly states it prefers to turn temporary workers into permanent residents. (Page 52, topic 139(ii)). Furthermore, the CPC endorsed CANZUK, which opens Canada's borders to some other nations.

Maxime Bernier sort of addressed immigration rates into Canada, and was critical. However, he avoided the awkward truth that these "temporary" categories can lead to permanent residence.

The National Citizens Alliance addressed the issue in this video. So far, other parties seem to embrace the "mass migration is good" delusion.

Many self-identified Conservatives claim they are for much less immigration. However, they balk at the claim (and evidence) that it is much higher than they thought.

This seems an exercise in futility, and has led to many arguments. But such a topic must be discussed openly. Certainly, the exact numbers, programs, lengths, conditions for various programs should be open to debate. But it must be an informed debate or discussion.

Once more: If a Conservative or Nationalist isn't willing to talk about the ***FULL SCALE*** of immigration into the country, there's no reason to trust anything they say on the subject.

6. Why Go On About This Topic?

Because people need to know the truth about it.

They are being lied to daily by the media, and by politicians. It is a much easier sell to Canadians if they aren't forced to look at the full numbers. It's also easier to pitch is the lie is perpetuated that the population is declining and needs a boost.

And to restate, true, not everyone who comes to Canada will stay (regardless of entry class). But most will, given the standard of life here. Our laws allow many such pathways.

In a sense, the UN Global Migration Compact was a diversion and a soft target. EVERYONE was against it, and what it stood for.

Serious question to Canadians: Do you want to replace yourselves?

Note: This is not to state that immigration into Canada has been 1 million/year continuously. Rather, it has been consistently trending upwards, and is now at 1M/year.
